

Energy Efficiency Policy Workshop
Asia Pacific Energy Research Center (APERC)

Singapore, Monday 23 March, 2015

The Asia Pacific Energy Research Center is pleased to present the Energy Efficiency Policy Workshop, which will take place ahead of the 45th meeting of the APERC Expert Group on Energy Efficiency and Conservation (EGEE&C).

The objective of the workshop is to develop capacity in energy efficiency policy for APEC economies, especially developing economies. **The workshop will concentrate on the way economies can fund energy efficiency policy, agencies, and programs.** The agenda will include opportunities for active participation from all attendees.

APERC would like to extend an invitation for all APEC economies to participate in this workshop. APERC has made funding available to assist travel eligible economies to attend the workshop.

More details on the content and registration will be forthcoming shortly but we encourage travel eligible economies to nominate candidates to participate on the workshop. Ideal candidates will be members of energy policy agencies that are looking to be involved in energy efficiency development.

For nominations and any enquiries please contact Martin Brown-Santirso at APERC (m.brown-santirso@aperc.iecej.or.jp).
